PELABUHAN MELAKA

Pelabuhan & Bahasa Bersama

Scratch game guide: how it works, how to edit it, and how to rebuild it in 60 minutes

Preview of the three screens: title, play (with the fact card) and ending. Drawn from the project files.

1. The game in one minute

You are the harbour helper at Melaka's port. Four trader ships arrive one by one (China, India, Arab, Jawa). Each greets you in its own language, then asks in **Bahasa Melayu** for one trade good. You click the right good. After each correct trade a fact card explains the trader and why Malay was the common language. After four ships you see the ending message and your score out of 40.

Part	What happens
Theme	Melaka: pelabuhan (port) dan bahasa bersama (common language / lingua franca).
Goal	Serve all 4 ships. Each correct trade = +10. Each wrong click = -2 (never below 0). Maximum score 40.
Controls	Mouse only: click MULA, click goods, click the fact card, click MAIN SEMULA.
Learning message	Trade, administration and meeting of cultures happened in Melaka. Bahasa Melayu was the language of trade that everyone could use.

2. Open it and play

- Install **Scratch Desktop** (scratch.mit.edu/download) or use the online editor at scratch.mit.edu/create.
- Open the file: **File > Load from your computer** and choose **Pelabuhan-Melaka.sb3**.
- Click the **green flag**, then **MULA**.
- Save your own copy: **File > Save to your computer** (offline) or **File > Save now** (when signed in).

The file is in the repo under `scratch-game/Pelabuhan-Melaka.sb3` (branch ccr-2e302cd3-oxlpug). I tested the logic in a headless Scratch engine, but not sound (there is none yet) and not inside the Scratch editor itself, so give it one full play-through before the event.

3. What is inside the project

Sprites and backdrops

Sprite / backdrop	What it is	Costumes / notes
Stage backdrops	Tajuk (title), Pelabuhan (play), Tamat (ending)	Harbour with jetty, sea and a Melaka-style roof house
Kapal (ship)	The trader ship	4 costumes in order: China, India, Arab, Jawa. Costume number = round number.

Sprite / backdrop	What it is	Costumes / notes
Lada, Sutera, Emas, Porselin	The four trade goods (clickable)	One sprite each, at the bottom of the screen
Kad Fakta (fact card)	Pop-up card after a correct trade	4 costumes, same order as the ships
Syahbandar	The harbour-master guide	Welcomes you; shows the final score
Butang Mula / Butang Semula	Start and restart buttons	Mula shows on the title; Semula shows at the end

Variables, lists and messages

Name	Type	Purpose
Skor	Variable	Score (0 to 40)
Salah	Variable	Number of wrong clicks
Pusingan	Variable	Round number 1-4; also picks the ship costume and fact card
Mahu	Variable	The good the current ship wants, e.g. LADA
Boleh Klik	Variable	1 = the player may click goods now; 0 = ignore clicks
Senarai Barang	List	LADA, SUTERA, EMAS, PORSELIN (the ship picks a random item)
Salam	List	Ni hao!, Vanakkam!, Assalamualaikum!, Sugeng rawuh! (item 1-4 = round)
Messages (broadcasts)	Events	Mula, Pusingan Baru, Betul, Salah, Fakta, Tamat

4. How the game flows

```
Flag clicked        -> title screen, MULA button
Click MULA          -> broadcast Mula
Mula                -> backdrop Pelabuhan, Skor/Salah/Pusingan = 0, goods + guide appear,
                       broadcast Pusingan Baru
Pusingan Baru       -> Pusingan + 1 ; ship costume = Pusingan ; Mahu = random good ;
                       ship glides in, says greeting, then "Saya mahu membeli <Mahu>"
                       Boleh Klik = 1
Click a good        -> if Boleh Klik = 1 and Mahu = that good : broadcast Betul
                       else : broadcast Salah
Betul               -> Skor + 10, "Terima kasih!", broadcast Fakta and wait,
                       ship leaves, broadcast Pusingan Baru
Salah               -> Salah + 1, Skor - 2 (if above 1), "Bukan itu! Cuba lagi."
Pusingan > 4        -> broadcast Tamat -> ending backdrop, guide shows the score,
                       MAIN SEMULA appears (click = broadcast Mula)
```

5. Scripts (block by block)

Use this section to rebuild or repair any sprite. Names in **bold** are blocks or dropdowns in Scratch.

Stage

```
when flag clicked
  switch backdrop to [Tajuk]
  hide variable [Skor] / [Salah] / [Pusingan]
  set [Boleh Klik] to 0

when I receive [Mula]
  switch backdrop to [Pelabuhan]
  set [Skor] to 0 ; set [Salah] to 0 ; set [Pusingan] to 0 ; set [Boleh Klik] to 0
  show variable [Skor] / [Pusingan] / [Salah]
  broadcast [Pusingan Baru]

when I receive [Tamat]
  switch backdrop to [Tamat]
  hide variable [Skor] / [Salah] / [Pusingan]
```

Kapal (the ship)

```
when flag clicked : hide

when I receive [Pusingan Baru]
  change [Pusingan] by 1
  if <(Pusingan) > 4> then
    hide ; broadcast [Tamat] ; stop [this script]
  switch costume to (Pusingan)            <- uses the number, 1 = China ... 4 = Jawa
  set [Mahu] to (item (pick random 1 to 4) of [Senarai Barang])
  go to x: -300 y: -5 ; show ; glide 2 secs to x: 0 y: -5
  say (item (Pusingan) of [Salam]) for 2 seconds
  say (join [Saya mahu membeli ] (Mahu))
  set [Boleh Klik] to 1

when I receive [Betul]
  set [Boleh Klik] to 0 ; change [Skor] by 10
  say [Terima kasih!] for 1.2 seconds ; say []
  broadcast [Fakta] and wait
  glide 2 secs to x: 300 y: -5 ; hide
  broadcast [Pusingan Baru]

when I receive [Salah]
  change [Salah] by 1
  if <(Skor) > 1> then change [Skor] by -2
  say [Bukan itu! Cuba lagi.] for 1.2 seconds
  say (join [Saya mahu membeli ] (Mahu))
```

Each good (Lada, Sutera, Emas, Porselin): same script, only the name changes

```
when flag clicked : hide
when I receive [Mula] : show
when I receive [Tamat] : hide

when this sprite clicked
  if <(Boleh Klik) = 1> then
    if <(Mahu) = [LADA]> then          <- use [SUTERA] / [EMAS] / [PORSELIN] in the others
      set [Boleh Klik] to 0 ; broadcast [Betul]
    else
      broadcast [Salah]

when flag clicked  (hover effect)
  forever: if <touching [mouse-pointer]?> then set size to 115 % else set size to 100 %
```

Kad Fakta, Syahbandar and the buttons

```
Kad Fakta
  when flag clicked : hide
  when I receive [Fakta]
    switch costume to (Pusingan) ; show ; wait 1
    wait until <mouse down?> ; hide ; wait 0.3

Syahbandar
  when flag clicked : hide
  when I receive [Mula] : show ; say [Selamat datang! Semua pedagang bertutur dalam Bahasa
Melayu.] for 3 s ; say []
  when I receive [Tamat] : show ; say (join [Markah anda: ] (join (Skor) [ / 40]))

Butang Mula   : when flag clicked: go to x:0 y:-60, show.  When this sprite clicked: hide,
broadcast [Mula]
Butang Semula : when flag clicked: hide.  When I receive [Tamat]: go to x:0 y:-100, show.
                When this sprite clicked: hide, broadcast [Mula]
```

6. Text you can edit

Please check the wording against your own notes. The cards are written in general terms and are not exact quotations.

Card	Text on the card
Pedagang China	Pedagang dari China singgah di Melaka untuk berdagang. Mereka berurusan dengan pedagang lain menggunakan Bahasa Melayu.
Pedagang India	Pedagang dari India membawa kain dan barangan ke Melaka. Bahasa Melayu membantu mereka berjual beli dengan pelbagai bangsa.
Pedagang Arab	Pedagang Arab datang ke Melaka membawa barangan dan ilmu. Bahasa Melayu menjadi bahasa perantaraan antara pedagang dari jauh.
Pedagang Jawa	Pedagang dari Jawa dan Kepulauan Melayu turut berdagang. Bahasa Melayu mudah difahami ramai, lalu menjadi bahasa bersama pelabuhan.
Ending	Melaka ialah pelabuhan tempat pelbagai bangsa bertemu: perdagangan, pentadbiran dan pertemuan budaya. Bahasa Melayu menjadi lingua franca, bahasa bersama untuk berdagang dan bersatu.

To change a card: select **Kad Fakta**, open the **Costumes** tab, click the card, and edit the text with the **Text** tool. To change greetings or goods: edit the **Salam** and **Senarai Barang** lists (tick them under Variables to show and edit).

7. If the task says: build it live in 60 minutes

Time	Do this	Done when
0-10	Pick the idea (this one), draw or choose a harbour backdrop, one ship costume, and 2-4 goods. Create the variables and the two lists.	Backdrop, 1 ship, goods and variables exist
10-30	Build the core with ONE ship: Pusingan Baru, goods click check, Betul / Salah, score.	You can serve one ship and score +10
30-45	Add ship costumes 2-4, the Salam list, and the Kad Fakta sprite with 4 cards.	All 4 traders appear with facts
45-55	Add MULA screen, Tamat screen and restart. Play the whole game once.	Full game loop works
55-60	Fix bugs, save the file, and be ready to explain it.	Saved and tested

Shortcuts that save time: duplicate a good sprite three times and rename it; use broadcasts instead of one long script; use the same costume number for ship and fact card; test after each step.

8. Ideas to make it better

- **Sound:** add a pop sound on correct, a buzz on wrong, and soft background music (Scratch has a sound library).
- **Timer or bonus:** a 60-second timer, or +5 bonus if you finish with no mistakes.
- **More traders:** add a fifth costume (check what fits your topic notes) and extend the two lists and the Pusingan limit.
- **Kamus bersama:** a screen with shared Malay trading words, such as harga, barang, terima kasih.
- **Your own art:** redraw the ships, goods and Syahbandar in the paint editor to make it truly yours.

9. Final checklist

Check	
The game starts from the green flag and the title screen	[ ]
A correct click gives +10 and shows the fact card	[ ]
A wrong click shows the message and the ship keeps asking	[ ]
After 4 ships the ending screen shows the score	[ ]
MAIN SEMULA restarts cleanly (score back to 0)	[ ]
No text is cut off in the speech bubbles or cards	[ ]
File saved (Save to your computer) and a backup copy made	[ ]
