PELABUHAN MELAKA

Pelabuhan & Bahasa Bersama

Scratch game guide (version 2): 5 levels, foreign-language traders, KAMUS, sound, 60-second timer and a win page

Screens: start page with instructions, play, KAMUS open, a fact card, the win page (Tahniah) and the lose page. Drawn from the project files.

1. The game in one minute

You are the harbour helper at Melaka's port. **Five different trader ships** arrive one by one (China, India, Arab, Parsi, Jawa). Each trader speaks in **their own foreign language** and asks for one trade good. Use the **KAMUS** to understand the foreign word, then click the right good. A right answer: the trader says **"Oh terima kasih!"**. A wrong answer: **"Kami tidak faham."** and you lose a life. Serve all five ships to win. Only then does the **Tahniah** page appear: **Bahasa Melayu = Lingua Franca = Bahasa Bersama**. You also have a **60-second timer**, a pop sound for correct, a buzz for wrong, soft background music, and a **+5 bonus** for finishing with no mistakes.

Part	What happens
Theme	Melaka: pelabuhan (port) dan bahasa bersama (common language / lingua franca).
Start page	Wide picture of Pelabuhan Melaka, title banner, an ARAHAN PERMAINAN card and the MULA button.
Levels	5 levels = 5 different ships. Each level = one trader, one foreign phrase, one good to match.
Score	+10 for each correct trade. -2 for each wrong click (never below 0). +5 bonus if you finish with no mistakes. Maximum 55.
Timer (Masa)	60 seconds in total. It counts down only while a ship is waiting for your answer, and pauses during the thank-you, the fact card and the ship moving. At 0 the lose page appears.
Sound	Pop on a correct trade, buzz on a wrong click, soft background music, a short fanfare on the win page and a sad tune on the lose page.

Part	What happens
Lives (Nyawa)	5 lives. Each wrong click costs one. At 0 lives or 0 seconds the lose page (Cuba lagi!) appears instead of the win page.
Controls	Mouse only: MULA, KAMUS, goods, fact card, MAIN SEMULA.

2. Open it and play

- Install **Scratch Desktop** (scratch.mit.edu/download) or use scratch.mit.edu/create.
- Open the file: **File > Load from your computer** and choose **Pelabuhan-Melaka.sb3**.
- Click the **green flag**, read the ARAHAN card, then click **MULA**.
- Save your own copy: **File > Save to your computer** (offline) or **File > Save now** (when signed in).

The file is in the repo as `scratch-game/Pelabuhan-Melaka.sb3` (branch ccr-2e302cd3-oxlpug). I tested the logic in a headless Scratch engine (start page, KAMUS, 5 levels, timer, bonus, win, restart and both ways to lose), but not inside the Scratch editor itself, and I could not listen to the sounds here, so please play it once fully with the volume on before the event.

3. The five levels (traders)

Level	Ship	Foreign phrase the trader says	Good to click	Language
1	China	Ni hao! Wo yao hujiao!	LADA	Mandarin (hujiao = pepper)
2	India	Vanakkam! Enakku pattu vendum!	SUTERA	Tamil (pattu = silk)
3	Arab	Assalamualaikum! Uridu dhahab!	EMAS	Arabic (dhahab = gold)
4	Parsi	Salam! Man chini mikhaham!	PORSELIN	Persian (chini = porcelain)
5	Jawa	Sugeng rawuh! Kula badhe tumbas cengkeh!	CENGKIH	Javanese (cengkeh = clove)

Please double-check the foreign phrases with someone who speaks the language if you can. They are short, simple phrases I wrote from memory.

7. Text you can edit

Please check the wording against your own notes. The cards are written in general terms and are not exact quotations.

Where	Text
Arahan card	1. Kapal pedagang tiba dan bercakap bahasa asing. 2. Buka KAMUS untuk faham perkataan mereka. 3. Klik barang dagangan yang betul. 4. Betul: "Oh terima kasih!" Salah: "Kami tidak faham." 5. Layani 5 kapal sebelum 5 nyawa habis atau 60 saat tamat. 6. Tiada kesilapan = bonus +5 markah!
Fact cards (5)	Pedagang China / India / Arab / Parsi / Jawa: each says the trader came to trade at Melaka and that Bahasa Melayu helped them deal with other traders.
Win page (Tahniah)	TAHNIAH! Anda berjaya melayani semua pedagang di Pelabuhan Melaka. BAHASA MELAYU - LINGUA FRANCA - BAHASA BERSAMA. Dengan bahasa yang sama, kita boleh berdagang dan bersatu.
Lose page	CUBA LAGI! Pedagang belum faham, atau masa sudah tamat. Guna butang KAMUS untuk memahami bahasa mereka. Bahasa Melayu membantu kita saling faham.

To change a card: select the sprite, open **Costumes**, click the card and edit with the **Text** tool. To change phrases or goods: edit the **Frasa** and **Senarai Barang** lists (tick them under Variables to show and edit).

8. If the task says: build it live in 60 minutes

Time	Do this	Done when
0-10	Pick the idea, draw or choose a harbour backdrop, one ship costume and 2-5 goods. Create the variables and the two lists.	Backdrop, 1 ship, goods and variables exist
10-30	Build the core with ONE ship: Level Baru, goods click check, Betul / Salah, score and lives.	You can serve one ship; wrong clicks cost a life
30-45	Add ship costumes 2-5, the Frasa list, and the KAMUS.	All traders appear with their foreign phrase
45-55	Add the start page with instructions, the Tahniah page and restart. Play the whole game once.	Full game loop works
55-60	Fix bugs, save the file, and be ready to explain it.	Saved and tested

Shortcuts: duplicate a good sprite and rename it; use broadcasts instead of one long script; use the same number (Level) for the ship costume, phrase and fact card; test after each step.

9. Ideas to make it better

- **Sounds:** the game includes 5 simple sounds I synthesised (pop, buzz, menang, kalah, musik). To change one: select the sprite, open **Sounds**, use **Choose a Sound** to pick one from Scratch's library, then use that name in the **start sound** block.
- **Per-ship timer:** give each ship its own 15-second timer instead of one 60-second timer.
- **Time bonus:** add points for seconds left when you win.
- **Random goods:** make each level ask for a random good so every play is different (you would need a longer KAMUS).
- **Your own art:** redraw the ships, goods and Syahbandar in the paint editor.
